24-Month Performance Data for the HIPAA-Funded Project Grantees (OEI-02-97-00524)

Edwin Walker, Director  
Office of Program Operations and Development  
Administration on Aging

At the request of the Administration on Aging (AoA), we have continued to collect performance data for the 18 HIPAA-Funded Project grantees. The attachment presents cumulative performance data for the first 24 months on the Projects.

A comparison to data collected from the previous reporting period reveals the following:

- C total number of trainers increased from 8,511 to 9,781.
- C total number of beneficiaries educated more than doubled from 10,727 to 25,556.
- C total complaints received increased by half from 6,318 to 9,852.
- C total Medicare funds identified for recoupment was \$1,400.

Please note that the data contained in the attachment are self reported, and that we have not verified their accuracy. However, for reports of dollar savings, we do request documentation. Both New York and Arizona claimed savings that have not been included in this report pending documentation.

Further, data for New York was presented in our earlier report *24-Month Performance Data for Senior Medicare Patrol Projects* (OEI-02-97-00523). New York receives funding from both programs but reports only one set of performance data.

We will continue to monitor these projects and provide you with 30-month performance data. If you have any questions please call me at 202-619-0480 or have you staff call Jack Molnar at 212-264-1998.

Attachment
